Stock Management System

Name :   P. Prem Sai
RollNo: 411856
RegNo: 981148
Class: 3rd CSE

6. Design Dynamic web pages effectively (using XHTML, CSS, DOM and JavaScript) of a stock maintenance system and provide validations for web pages if any required, the website should consist the following pages, home page with required info, registration and staff login, staff profile page, products catalog, stock information for each product, information about frequently selling products, information about items which are considered old stock, stock information of products per day, week, monthly, quarterly, half yearly & yearly reports.
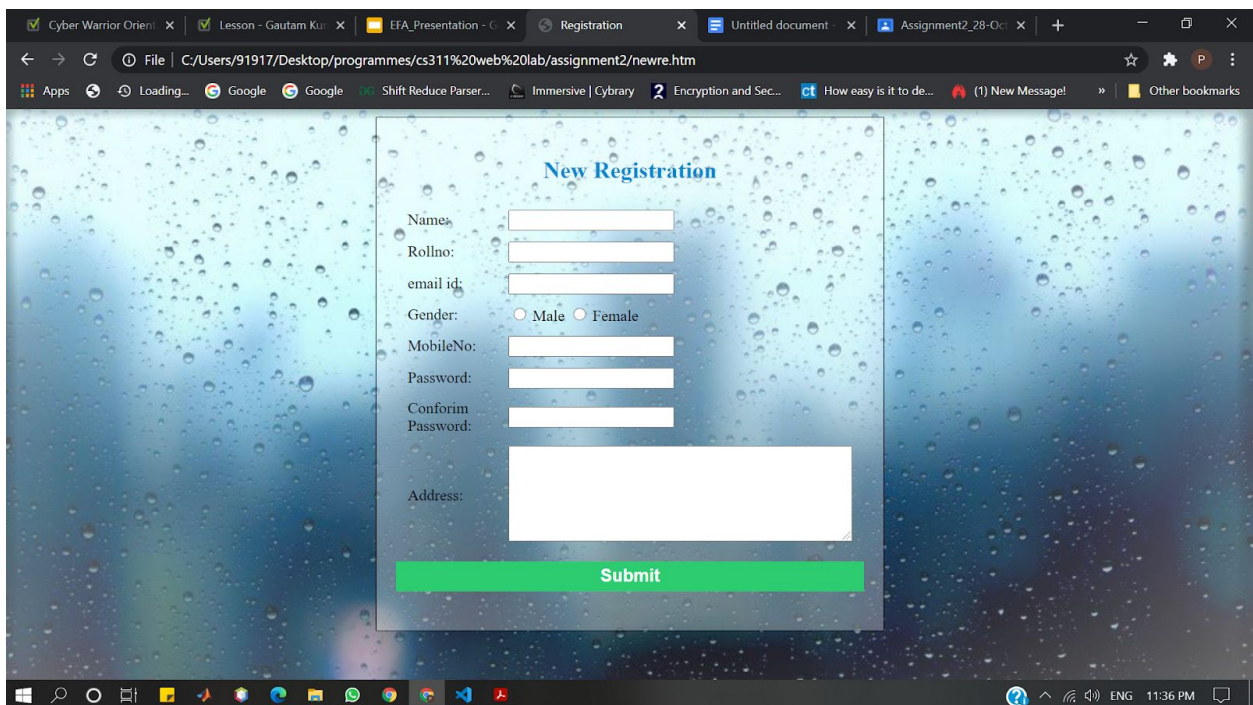

Login Page :

The login page contains validations with javascript. You can login as username and password as "admin". It also contains links to forget password and new registration.

New Registration:

The new registration contains a form of basic information.And each field to be filled the password and confirm password are validated using javascript.

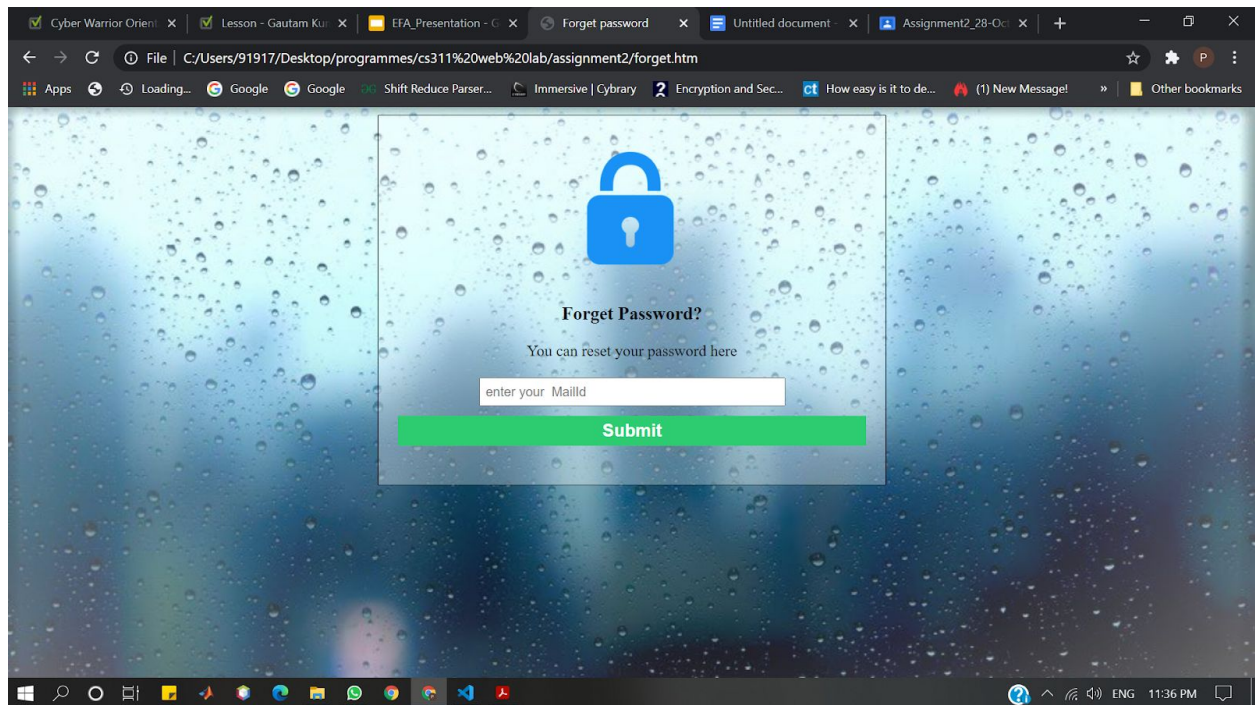

Forget Password:

This page has a field which takes email.And it is linked back to the login page.

Home Page:

The homepage consists of a dashboard,catalog,stock list,frequent stocks, old stock,report in the vertical menu bar.And also has a profile page and logout links in the dropdown button.

The report also has 3 links which open in a new tab. This tab gives stock information at a particular time. And this printable in a pdf format.
